- How to avoid and manage gastro, traveller's diarrhoea, hepatitis, malaria, etc
- Jet lag, motion sickness, mosquito net treatment
- Specific advice for diabetes, pregnancy, children
- Useful first aid section and symptom guide

A CONSTANT COMPANION AND POPULAR RESOURCE FOR THOSE WITH A SENSE OF ADVENTURE

More than two million Australians travel overseas each year with up to 50% reporting associated illness. Much of this illness is preventable with appropriate advice. It is the only Australian travel medical guide to include an "International Certificate of Vaccination" in accordance with WHO guidelines. General Practitioners using the booklet have found it to be invaluable both as a patient held vaccination record and time-saving information handout. Information entered by medical practitioners is accepted internationally and this book is now the new standard for Australian travellers and their doctors.

RRP per booklet \$9.90. Order 20 booklets at \$3.85 each or 100 booklets at \$3.30 each, P&P will be advised per order. Further discounts apply for larger orders.
